

Finding your way around the MNNIT R&C Portal

This guide walks each role — Faculty, Head of Department, Dean and R&C Office staff, Director, SuperAdmin, Library, Computer Centre, Fellow, and Applicant — through the screens they use and the approval logic behind each step, illustrated with real screens from the running system.

Scope: every module reachable from each role's sidebar **Source:** live walkthrough of the portal, August 2026

Format: print or export to PDF from your browser

01 Faculty	02 Head of Department
03 Dean & R&C Office	04 Director
05 SuperAdmin	06 Library & Computer Centre
07 Fellow	08 Applicant

Faculty (Principal Investigator)

A Faculty member is a **Principal Investigator (PI)** — the person who wins a research grant, consultancy contract, or testing assignment and is accountable for running it. Everything in this portal exists ultimately to serve the PI's workflow: proposing research, receiving sanctioned funds, spending them against a budget, hiring project staff, and reporting back to the institute.

Because a PI's data is personal to their own projects, almost every Faculty page is scoped to **"my work"** — a PI cannot see another PI's projects or proposals, only their own.

Signed in as faculty1 • Faculty Member One • Computer Science & Engineering

1.1 Dashboard & profile

The landing screen after login. It is intentionally sparse — a count of pending actions, active projects, and notifications — because a PI's real work happens inside Projects and Proposals, not on this summary card.

- 1 Log in at the portal's **Faculty** tab. The dashboard shows **14 active projects** for this account, with pending-action and notification counters that update as approvals move.

2

The **My Profile** page holds the PI's institutional identity — employee ID, department, qualification — the same identity every approval screen downstream will display next to their name.

1.2 Research proposals

Before a project exists, it is a proposal. A PI drafts it, the proposal moves through an internal approval chain, and only once it is sanctioned does the system turn it into a live Project with a real budget.

1

The **Research Proposals** list shows every proposal this PI has raised, its funding agency, proposed amount, and where it currently sits in the approval chain — Draft, Approved (internal), Sanctioned, or Rejected.

Research Proposals

Your proposals and where each stands in the approval chain.

TITLE	AGENCY	PROPOSED AMOUNT	STATUS	STAGE	CREATED
AI-Based Power Grid optimization Project	DST	₹25,00,000.00	Sanctioned	Approved	26/8/2026
Hellooo	gfgfgf	₹1,00,000.00	Approved (internal)	Approved	25/8/2026
Machine Learning	IIS	₹20,00,000.00	Rejected	Rejected	25/8/2026

/proposals

2

WHY A proposal only becomes spendable money after it clears HOD review and the R&C office records a sanction from the funding agency — the same discipline a paper file would have required, now enforced by the system instead of a signature register.

New Proposal opens a structured intake form — title, funding agency, advertisement reference, and the supporting detail the HOD and R&C office will review.

← Back to proposals

Create Research Proposal

Prepare a comprehensive draft of your research proposal. This draft will remain editable in your workspace until you officially submit it into the approval chain.

Basic Information

PROPOSAL TITLE *

Enter a descriptive title for your research

FUNDING AGENCY *

e.g. DST, SERB, AICTE

ADVERTISEMENT REF.

Optional reference number

/proposals/new

3

Opening a proposal shows its **Approval Timeline** alongside a live BRD \$A1 expiry countdown — a reminder that a sanctioned proposal must be converted to a project within a fixed window, or it lapses.

1.3 Projects, budget & expenditure

Once sanctioned, a proposal becomes a Project — the container for every rupee the PI is entitled to spend, every piece of equipment bought against it, and every scholar hired under it.

1

The **My Projects** list is a PI's working desk: sanction number, funding agency, timeline, and total sanctioned amount for every project they run, with quick actions to view, edit, or add a grant receipt.

The screenshot shows the 'My Projects' dashboard for a Faculty Member. The left sidebar contains navigation links: Dashboard, Projects (highlighted), Expenditure Details, Add Grant Received, Type-I: Research Projects, Type-II: Industry Projects, Type-III: Consultancy, and Type-IV: Testing. The main content area is titled 'My Projects' and includes a search bar and a filter dropdown for 'All Project Types'. Below this is a table of projects:

S.NO	PROJECT INFO	AGENCY	TIMELINE	FUNDING	ACTIONS
1	Test Project Type-I: Research Projects	DST	Started: 2024-06-01 Duration: 36 mo	₹2,00,000.00 Total Sanctioned	View, Edit, Delete icons
2	Phase 3d EZE Project Type-I: Research Projects	DST	Started: 2024-06-01 Duration: 36 mo	₹6,00,000.00 Total Sanctioned	View, Edit, Delete icons
3	College management software	HCL	Started: 2026-08-10	₹10,00,000.00	View, Edit, Delete icons

The URL bar shows `/projects`.

2

A project's detail page opens on its **Overview & Basic Info** — type, sanction date, start date, and duration — with collaborators, equipment, manpower, and travel sections below it.

The screenshot shows the 'Test Project' detail page. The left sidebar is the same as in the previous screenshot. The main content area is titled 'Test Project' and includes an 'Edit Project' button. Below the title is a summary bar showing: Sanction No: SAN-TEST-001, Agency: DST, Total Sanctioned: ₹2,00,000.00. The 'Overview & Basic Info' section contains the following details:

PROJECT TYPE	SANCTION DATE	START DATE	DURATION
Type-I: Research Projects	2024-06-01	2024-06-01	36 Months

Below this section is a 'Collaborators' section. The URL bar shows `/projects/:id`.

3

Scrolling down the same page shows **Equipment** and **Manpower Details** already committed against this project's budget, each with its own status chip (Indent Raised, Not Raised, Screening proforma generated) so a PI can see exactly what has left the sanctioned amount.

The screenshot displays the MNNIT R&C Faculty portal. The left sidebar contains navigation links: Payment Voucher, Noting Page, Number of Projects, Grant Sanctioned, Project-wise Expenditure, Project-wise Overhead, Refund Reports, Staff Count, and Project-wise Equipment. The main content area shows two tables. The first table, titled 'Equipment', has columns: S.NO, EQUIPMENT NAME, UNIT, AMOUNT (₹), STATUS, and ACTION. It contains two rows: Row 1 with S.NO 1, EQUIPMENT NAME 'hgh', UNIT 1, AMOUNT ₹122.00, and STATUS 'Indent Raised'; Row 2 with S.NO 2, EQUIPMENT NAME 'ttt', UNIT 5, AMOUNT ₹855.00, and STATUS 'Not Raised'. The second table, titled 'Manpower Details', has columns: S.NO, DESIGNATION, POSITIONS, STIPEND, HRA, STATUS, and ACTION. It contains one row: Row 1 with S.NO 1, DESIGNATION 'jrf', POSITIONS 1, STIPEND ₹40,000.00, HRA ₹4,400.00, and STATUS 'Screening proforma generated'. Below the tables, the URL '/projects/:id - equipment & manpower' is visible.

4

WHY Travel is grouped separately because BRD rules route it through its own approval path rather than the procurement chain — a conference flight is not a lab purchase.

Further down, non-consumable indents and a dedicated **Recurring: Travel** panel let the PI raise a travel request directly against the project.

The screenshot displays the MNNIT R&C Faculty portal. The left sidebar contains navigation links: Payment Voucher, Noting Page, Number of Projects, Grant Sanctioned, Project-wise Expenditure, Project-wise Overhead, Refund Reports, Staff Count, and Project-wise Equipment. The main content area shows a table with columns: S.NO, ITEM NAME, EST. COST (₹), FORM, STAGE, RAISED, and ACTION. It contains one row: Row 1 with S.NO 1, ITEM NAME 'sfvf', EST. COST ₹8,410.00, FORM 'Annexure 6', STAGE 'Raised', and RAISED date '20/8/2026'. Below the table, there is a section titled 'Recurring: Travel' with a button 'Raise a new travel request' and a message 'No travel requests raised yet'. Below this section, the URL '/projects/:id - travel' is visible.

5

Raise a new travel request opens a compact form — traveller, mode, place and dates of visit — checked in real time against the project's remaining budget before it can be submitted.

/projects/:id – Raise Travel Request dialog

6

Expenditure Details lets a PI search transaction history by project, budget head, and date range — the day-to-day answer to "what have I actually spent so far?"

/expenditure-details

WHY Grants rarely arrive in one transfer — a funding agency typically releases a project's budget year by year, sometimes head by head. Recording each receipt separately is how the system knows how much of the sanctioned amount has actually landed, as opposed to merely been promised.

Add Grant Received — reached directly at `/add-grant`, separate from the per-project "add receipt" action on the project page — is a standalone form: pick a project, pick the funding year, and the sanctioned amount for every budget head (Consumable, Manpower, Contingency, Equipment, Overhead, Field Charges, Travel) appears next to an editable "Grant Received" field, pre-filled with whatever has already been recorded for that year.

Year 1

BUDGET HEAD	SANCTIONED AMOUNT (₹)	GRANT RECEIVED (₹)
RecurringConsumable	₹4,000.00	2000

`/add-grant`

WHY The form's own source comment spells this out: a PI creates a project themselves through the Research Proposal pipeline (§1.2), which becomes a Project automatically once the office records the funding agency's sanction. This second form exists only for entering a legacy or offline-sanctioned project that never had a proposal on file in the system — so it is reachable from the office side (Deputy Registrar, Dean), not from a PI's own account.

A second, differently-purposed **Add New Project** form exists at `/projects/new` — do not confuse it with **New Proposal** from §1.2. It carries the same project-type, sanction, and budget-head fields as the proposal form, but skips the approval chain entirely: filling it in and saving creates a live Project immediately.

The screenshot displays the MNNIT R&C Deputy Registrar portal. The left sidebar contains navigation links: Dashboard, Projects (highlighted), Recruitment, PhD NOC Requests, ID Card Requests, R&C Office Proposals, Processed Requests, and Approved Requests. The main content area is titled 'Submit Research Proposal' with a subtitle 'Create a new project proposal and define budget, manpower, and collaborators.' Below this is the 'Add New Project' form, which includes a 'PROJECT TYPE' section with five radio button options: Type-I: Research Projects (selected), Type-II: Industry sponsored Projects, Type-III: Consultancy Project, Type IV: Testing, and Type V: Other activities. The 'BASIC DETAILS' section contains three input fields: 'SANCTION NO.' (with example 'e.g. DST/SERB/2026/001'), 'SANCTION DATE' (with placeholder 'dd-mm-yyyy' and a calendar icon), and 'PROJECT TITLE' (with example 'e.g. AI-driven Smart Grid Optimization'). A 'Log Out' button is visible in the top right corner. The URL `/projects/new` is shown at the bottom of the page.

9

Five sidebar shortcuts — **Type-I: Research Projects**, **Type-II: Industry Projects**, **Type-III: Consultancy**, **Type-IV: Testing**, and **Type-V: Other Activities** — are pre-filtered views of the same Projects list, one per project type. They save a PI the extra step of filtering the full list by hand when they only care about one category of project.

1.4 Procurement (Consumable / Contingency / Equipment)

A PI cannot simply buy equipment against project funds — every purchase is raised as an **Indent**, which then travels through the office approval chain shown later in the HOD and Dean sections.

1

The **Procurement** page lists every indent this PI has raised across all their projects, filterable by GeM/Non-GeM type and stage.

Procurement
Manage GeM and Non-GeM indents

+ Raise New Indent

Indents are raised from within a project, because each one draws against a specific budget head.

All Types All Stages

Showing 20 of 20 indents

S.NO	ITEM NAME	PROJECT	TYPE	EST. COST (₹)	FORM	STAGE	RAISED
1	RAM	Test Project	Consumable	₹6,000.00	Annexure 6	Raised	20/8/2026
2	sfvf	Test Project	Contingency	₹8,410.00	Annexure 6	Raised	20/8/2026

/procurement

2

WHY Each requisition category has a different BRD approval band and paperwork (Annexure 6, NAC certificates, quotations) — separating them at the point of creation keeps the right rules attached from the start.

Raise New Indent first asks which project the spend is against, then whether it is **Consumable**, **Contingency**, or **Equipment** — each category carries a different downstream approval route.

Raise New Procurement Indent
Select project & requisition category (BRD A7)

SELECT RESEARCH PROJECT *

Contingency
Services, Minor Repairs

Equipment
Capital Equipment

Cancel Proceed to Form -->

/procurement – Raise New Indent dialog

3

An indent's detail page tracks estimated cost, GeM availability, its approval timeline, and the mandatory documents — the generated indent form, the signed copy, and (for GeM purchases) the quotation — that must be uploaded before it can proceed.

The screenshot displays the MNNIT R&C Faculty portal interface. The sidebar on the left contains navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Type-I: Research Projects, Type-II: Industry Projects, Type-III: Consultancy, and Type-IV: Testing. The main content area shows the details of a project named 'RAM'. At the top, there is a 'Back to project' link. Below it, the project name 'RAM' is displayed with a cube icon. To the right, the 'ESTIMATED COST' is shown as ₹6,000.00. Below the project name, there are tabs for 'Consumable', 'Annexure 6', and 'Raised'. A status bar indicates 'GeM — up to ₹50,000 — GeM availability: Yes'. The 'Approval Timeline' section shows 'No workflow activity yet.' The 'Documents' section lists three mandatory documents: 'Generated Indent Form', 'Signed Indent Copy', and 'GeM Quotation', each with an 'Upload this' link. A dashed box at the bottom of the documents section contains a cloud icon and the text 'Drag & drop a file here, or click to browse'. The URL at the bottom of the page is '/procurement/:indentType/:indentId'.

1.5 Recruitment

Hiring a Junior Research Fellow or project staff member is a long, regulated pipeline: advertise the position, screen and interview candidates, rank them on a merit list, extend an offer, and process their joining. The portal tracks every stage in one place.

1

The **Recruitment** list shows every position this PI has raised, across every project, each tagged with its current stage — Screening in progress, Merit list prepared, Offer issued, or Joined.

Recruitment
Your recruitment drives, across every project. Start one from a project's sanctioned positions.

S.NO	POSITION	ROUND	APPLICANTS	STAGE	RAISED
1	jrf	1	1	Joined	26/8/2026
2	Software	1	1	Approved	26/8/2026
3	Software	1	1	Merit list prepared	26/8/2026
4	sfbsfbsf	1	1	Offer issued	25/8/2026
5	Tester	1	0	Screening in progress	24/8/2026

/recruitment

2

WHY A screening committee and documented eligibility criteria are required before any candidate is interviewed — this protects the PI and the institute from a later challenge to the fairness of the hire.

Opening a recruitment round shows its applicants, each with qualification, interview mode, and outcome, alongside the configured **Screening Committee** and downloadable advertisement.

1.6 Fellowship claims, leave, ID cards & NOC

Once a scholar is hired, the PI becomes their first line of review for monthly fellowship claims, leave, and any request that needs the PI's endorsement before it reaches the Head of Department.

1

Fellowship Claims — PI Queue is where a PI reviews their scholars' monthly stipend claims and forwards them to the HOD; the counters up top separate what needs action from what is already approved.

Fellowship Claims — PI Queue
Review fellowship claims from your project's scholars and forward to HOD.

NEEDS MY ACTION 0

Needs My Action Forwarded All

No fellowship claims match your search or filter.

/fellowship-claims

2

Leave & NOC Approvals covers a scholar's annual and special leave entitlement (30 + 15 days per BRD) and their PhD No-Objection Certificate applications in one screen, filterable by status.

Leave & NOC Approvals R&C Workflow Queue

Review scholar leave entitlement claims (Annual 30 Days, Special 15 Days) and PhD NOC applications

Leave Requests (0) PhD NOC Requests (4)

Search leave claims...

Filter: All Pending Approved Rejected

No leave requests found.

/leave-approvals

WHY A No-Objection Certificate is what lets a scholar visit another institute, industry, or conduct external research without jeopardising their MNNIT registration — the PI's endorsement confirms it does not interfere with their project commitments.

PhD NOC Requests lets a PI raise or review NOC applications and download the issued certificate once approved.

/noc-requests

WHY An ID card is only issued after every party in the chain — Library, PI, HOD, and Dean — has confirmed the scholar is legitimately enrolled, which is why the request must pass through all four in strict order.

Student ID Card Requests shows the four-stage sequential approval pipeline (Library → PI → HOD → Dean) for a research scholar's ID card, with a queue view per stage.

Research Scholar ID Card Management

Role-Gated 4-Tier Sequential Workflow

Strict Sequential Approval Chain: Library → PI → HOD → Dean. Each stage requires its exact designated role.

ROLE-GATED SEQUENTIAL APPROVAL HIERARCHY PIPELINE (BRD A4):

/id-card-requests

1.7 Payment vouchers, noting & reports

The paperwork side of running a project: formal payment vouchers for the accounts office, official notes and orders, and a bank of reports for tracking a PI's own portfolio.

1

Payment Voucher generates the official R&C office voucher — choosing between the standard form (up to ₹1,00,000) and the higher-value form — pre-filled with the institute's letterhead detail.

The screenshot displays the MNNIT R&C Faculty dashboard. The left sidebar contains navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Type-I: Research Projects, Type-II: Industry Projects, Type-III: Consultancy, and Type-IV: Testing. The main content area is titled "Project Payment Voucher" and includes a "Create Payment Voucher" button and a "History & Status (4)" link. Below this, the "FORM MODE" is set to "Official R&C Voucher Standard Form". The form header reads "MOTILAL NEHRU NATIONAL INSTITUTE OF TECHNOLOGY ALLAHABAD" and "Office of the Dean (Research & Consultancy)". The form body has two radio button options: "Project Payment Voucher (Up to ₹ 1,00,000/-)" (selected) and "Project Payment Voucher (More than ₹ 1,00,000/-)". The URL "/payment-voucher" is visible at the bottom.

2

The **Noting Page** produces the formal "Notes & Orders" document — the internal file note that accompanies a project action through the office — auto-filled from the project's own header information.

The screenshot displays the MNNIT R&C Faculty dashboard. The left sidebar contains navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Type-I: Research Projects, Type-II: Industry Projects, Type-III: Consultancy, and Type-IV: Testing. The main content area is titled "Noting Page & Notes & Orders" and includes a "Create / Edit Noting" button and a "Document Layout" link. Below this, the "Project & Header Information" section contains three input fields: "FUNDED AGENCY" (with example "e.g. NBCC funded"), "PROJECT TITLE" (with placeholder "Enter project title"), and "PROJECT NO." (with example "e.g. CP-00281-2025-26"). There is also a "DATE" field with a calendar icon and a "dd-mm-yyyy" format. The URL "/noting-page" is visible at the bottom.

3

Reports gathers every metric a PI can pull for their own portfolio — number of projects, grant sanctioned, project-wise expenditure and overhead, staff count, equipment, and recruitment funnel — as one tabbed screen with Excel/PDF export.

The screenshot displays the MNNIT R&C Faculty Reports interface. The left sidebar contains navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Type-I: Research Projects, Type-II: Industry Projects, Type-III: Consultancy, and Type-IV: Testing. The main content area is titled 'Reports' and includes a subtitle 'Research track reporting -- projects, grants, expenditure and staff.' Below this, there are tabs for 'Number of Projects' (selected), 'Grant Sanctioned', 'Project-wise Expenditure', 'Project-wise Overhead', 'Refund Reports', 'Staff Count', 'Project-wise Equipment List', and 'Recruitment Funnel'. The 'Number of Projects' section shows 'Project counts grouped by project type and department.' It includes date range filters for 'FROM' and 'TO' (dd-mm-yyyy) and buttons for 'Export Excel' and 'Export PDF'. A table displays the following data:

PROJECT TYPE	DEPARTMENT	COUNT
TypeIResearch	Computer Science & Engineering	13

The URL at the bottom of the page is `/reports/number-of-projects`.

Head of Department

The **Head of Department (HOD)** is the first institutional checkpoint above the PI. Nothing here is about doing research — it is about departmental oversight: confirming a proposal is worth sending onward, that a claim or leave request is genuine, and that department funds (the Department Development Fund, or DDF) are tracked honestly.

Every HOD page is scoped to **their own department** — an HOD in Computer Science never sees Mechanical Engineering's queue.

Signed in as hod1 • HOD, Computer Science & Engineering

2.1 Executive portal & proposal queue

The HOD's real dashboard is not the generic one — it is the department-specific **Executive Portal**, which rolls every pending approval type into one operational view.

- 1 The **HOD Executive Portal** shows total pending approvals, active department projects, DDF balance, and how many approvals were forwarded this month — a single screen answering "what needs my attention today?"

The screenshot displays the 'Head of Department (HOD) Executive Portal' for MNNIT R&C. The interface includes a dark sidebar with navigation links: Dashboard, Projects, Recruitment, Fellowship, Department Proposal Queue, PhD NOC Requests, and Student ID Card Requests. The main content area features a header with the user's name 'HOD Computer Science' and a 'Log Out' button. Below the header, the portal title 'Head of Department (HOD) Executive Portal' is shown, along with a description: 'Department-wide oversight, approval workflows, PI assignments, and financial overhead monitoring'. Two buttons are visible: 'BRD Unified Portal' and 'DDF & Overhead Funds Dashboard'. The dashboard is divided into four key metrics: 'TOTAL PENDING HOD APPROVALS' (13 Action Items), 'ACTIVE DEPARTMENT PROJECTS' (18 Projects), 'DDF BALANCE (20%)' (₹1,65,000), and 'FORWARDED THIS MONTH' (24 Approvals). Below these, a section titled 'Pending Department Approval Queues' shows three categories, each with '2 Pending' items. The URL '/hod-dashboard' is visible at the bottom.

WHY The HOD is the department's own quality gate on a proposal before it goes to the institute-level R&C office — catching a duplicate, an unrealistic budget, or a scope conflict early is cheaper than catching it after the funding agency has already been approached.

The **Department Proposal Queue** lists every research proposal raised within the department, waiting for the HOD's approve, return, or reject decision.

2.2 Indent, fellowship, leave & joining approvals

Four separate queues, each corresponding to a different kind of request that needs the HOD's seal before moving to the R&C office or Dean.

1

WHY BRD §A7 sets the HOD as the mandatory first sign-off on every procurement indent — verifying budget availability and a genuine Non-Availability Certificate before an item can even reach the Superintendent or Director's higher-value approval bands.

Indent Approvals is where a HOD verifies non-availability certificates, checks committed-plus-paid budget, and applies the official HOD stamp to a procurement request.

/indent-approvals

2

Fellowship Approvals is the second step for a scholar's stipend claim, after the PI has already reviewed it — the same "needs my action / approved" split as the PI's own queue.

/fellowship-claims

WHY A joining report confirms the candidate actually reported for duty, passed a medical fitness check, and matches the selection committee's decision — the HOD's forward is the department's certification of all three before pay begins.

Recruitment Joining Report Approvals lets a HOD verify the selection minutes, joining letter, and medical fitness documents for a newly hired scholar, then forward the file to the Dean or Deputy Registrar.

The screenshot displays the MNNIT R&C HOD portal. The left sidebar contains navigation links: Dashboard, Projects, Recruitment, Fellowship, Department Proposal Queue, PhD NOC Requests, and Student ID Card Requests. The main content area is titled "Recruitment Joining Report Approvals" with a sub-header "HOD Routing Queue". Below this is a search bar "Search by Candidate, PI, or Project..." and a status filter "Status: All Pending HOD Forwarded". A table lists recruitment entries, including one for "JNR-2026-DE052 test jrf" with Rank #1, which has been "Forwarded to Dean/DR". The table also shows details for the PI, Faculty Member One, Selection Committee Chair, and Shubham Maurya. A "Joining Documents" button is visible. The bottom of the page shows the URL "/joining-reports".

Entry ID	Test Name	Rank	Status	PI	Faculty Member	Selection Committee Chair	Joining Date	Stipend	HRA	Monthly Emolument	Joining Documents
JNR-2026-DE052	test jrf	Rank #1	Forwarded to Dean/DR	PI: Faculty Member One		Selection Committee Chair: Shubham Maurya	2026-08-31	₹5,000	+₹1,000	₹6,000	Joining Documents

2.3 Consultancy assignment & overhead funds

Two pages unique to the HOD's oversight role: assigning staff to external consultancy work, and monitoring how much of the department's overhead income is available to spend.

1

Consultancy & Testing Request Assignment is where client-facing consultancy and testing requests land – the HOD assigns a Principal Investigator and Co-PI, checks the approval threshold against invoice value, and can view the department's revenue share before approving.

The screenshot displays the MNNIT R&C HOD portal interface. The top navigation bar includes the MNNIT R&C logo, the user's name 'HOD Computer Science', and a 'Log Out' button. A left sidebar lists various menu items: Dashboard, Projects, Recruitment, Fellowship, Department Proposal Queue, PhD NOC Requests, and Student ID Card Requests. The main content area is titled 'Consultancy & Testing Request Assignment' with a subtitle 'HOD Assignment Module'. Below the title is a brief description: 'Review client consultancy/testing requests, assign PIs & Co-PIs, verify approval thresholds, and view HOD revenue distribution'. A search bar and a 'Project Category' filter (set to 'ALL') are present. The main card displays details for a specific request: 'Concrete Core Testing & Structural Integrity Audit for Flyover'. It includes the client name 'L&T Infrastructure Projects Ltd. (Larsen & Toubro Ltd.)', GSTIN '09AAACL1234H1Z5', and the approval path 'Dean Approval Only (Base ≤ ₹1,00,000)'. A table shows the financial breakdown: Base Cost of ₹85,000, GST (18%) of ₹15,300, and a Total Invoice of ₹1,00,300. A 'View HOD 2.5% Share' link and an 'Assign PI & Approve' button are also visible. The URL '/consultancy-requests' is shown at the bottom.

/consultancy-requests

WHY BRD \$A8 splits every consultancy/overhead rupee 40% to the PI's own professional development fund, 20% to the department, and 40% to the institute — this dashboard is the department's restricted view of only the 20% slice that belongs to it.

The **Overhead Funds Dashboard** tracks the Department Development Fund (20% share) and each PI's Professional Development Fund (40% share) balance, with a full transaction ledger and an exportable statement.

ROLE 03

Dean & R&C Office

The **Office of the Dean (Research & Consultancy)** runs the institute-wide administrative machine behind every research activity: recording a proposal's fate with the funding agency, generating offer letters, managing announcements, creating faculty accounts, and moving requests through the Deputy Registrar and Superintendent's processing chain.

This section covers **Dean, Deputy Registrar, and Superintendent** together — they share almost the same page set because R&C office staff are seeded into the R&C department, which the system treats as institute-wide by nature of the office itself, not by role seniority.

Signed in as deanrc (Dean) and dyregrc (Deputy Registrar)

3.1 R&C Office proposal queue

Once a proposal clears the HOD, it enters the R&C office's own queue — the institute-level checkpoint before a proposal is treated as officially sanctioned.

1

WHY Recording the agency's actual sanction letter — not just an internal approval — is what BRD policy calls the institute-level sign-off: the funds do not exist until the office has this on file, however far the internal chain has already progressed.

R&C Office Proposals lists every proposal moving through the office chain (R&C Office → Dealing Assistant → Superintendent → Deputy Registrar → Dean), where staff record the agency's submission, sanction, or "not funded" outcome.

3.2 Request queues & payments

Every request that reaches the office — indents, travel, refunds — passes through a chain of hand-offs. These three pages are that chain, split by where a request currently sits.

1

Processed Requests shows what a staff member has already actioned, filtered by their current office role — here, the Deputy Registrar's own processed queue.

/processed-requests

2

WHY Recording a Unique Transaction Reference (UTR) against every approved request closes the loop between an approval and the actual bank transfer — without it, an "approved" request has no proof the institute ever paid.

Update Payment is where the Deputy Registrar records the payment reference (UTR) and status once an approved request has actually been paid out.

3.3 Faculty accounts & offer letters

Two forms unique to the office's administrative authority: onboarding a new faculty member into the system, and generating the manpower offer letter that formally hires a candidate.

1

WHY A faculty account cannot be self-registered — unlike an Applicant, a Faculty member's identity, department, and employee ID must be verified by the office before they can raise a single proposal.

Create Faculty User registers a new faculty member, using their Employee ID as the login username, with department, gender, and qualification captured up front.

The screenshot displays the 'Create Faculty User' interface within the MNNIT R&C system. The top navigation bar includes the MNNIT R&C logo, the user's role 'Dean R&C', and a 'Log Out' button. A left sidebar lists various administrative functions: Dashboard, Projects, Expenditure Details, Add Grant Received, Recruitment, Fellowship, Research Proposals, and PhD NOC Requests. The main content area is titled 'Create Faculty User' with a sub-instruction: 'Register a new faculty member. The username will be the Employee ID.' Below this, a 'Personal Information' section contains six required fields: Employee ID (text input), Department (dropdown menu), Full Name (text input), Gender (dropdown menu), Email (text input), and Qualification (dropdown menu). Each field is accompanied by a small icon representing its data type (person for ID, Name, Gender; building for Department; envelope for Email; graduation cap for Qualification). The URL '/create-faculty-user' is visible at the bottom of the page.

2

Generate Manpower Offer Letter pulls a project's sanctioned manpower position and a candidate's details into the institute's official offer letter template.

The screenshot shows the 'Generate Manpower Offer Letter' form. It has a sidebar with navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Recruitment, Fellowship, Research Proposals, and PhD NOC Requests. The main content area has a header 'Generate Manpower Offer Letter' with a document icon. Below the header, there are two sections: 'Project & Position' and 'Candidate Details'. The 'Project & Position' section has two dropdown menus: 'Select Project *' (with a placeholder '-- Select Project --') and 'Select Manpower Position *' (with a placeholder '-- Select Position --'). The 'Candidate Details' section has two input fields: 'Candidate Name *' (with a placeholder 'Enter candidate name') and 'Gender *' (with a placeholder '-- Select Gender --'). At the bottom of the form, the URL '/generate-manpower-offer-letter' is displayed.

3.4 Content: announcements & news

The office also runs the institute's public-facing research content — job announcements and news updates that anyone visiting the portal's public pages can see.

1

Manage Announcements lists every call-for-proposal and project announcement, with counts of active, expired, and total announcements, and full create/edit control.

The screenshot shows the 'Manage Announcements' form. It has a sidebar with navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Recruitment, Fellowship, Research Proposals, and PhD NOC Requests. The main content area has a header 'Manage Announcements' with a '+ Add Announcement' button. Below the header, there is a sub-header 'Create, update and manage all job and project announcements.' and a summary section with four cards: 'Total Announcements 3', 'Active 2', 'Expired 1', and 'Total Categories 2'. Below the summary section, there is a search bar 'Search announcements...' and a status filter 'All Status'. Below the search bar, there is a table with columns: Title, Category, Dates, and Status. The table contains three rows of announcements. The first row is 'acdadv' with category 'Call for Proposal' and dates 'Aug 15, 2026'. The second row is 'INSPIRE Fellowship awarded to Ms. Pragati Pandey under the mentorship of Dr. Sahdeo Padhiye, Department of Mathematics.' with category 'Sanctioned Research Project' and dates 'Aug 13, 2026 - Aug 25, 2026'. The third row is 'INSPIRE Fellowship awarded to Ms. Shiva Dubey under the supervision of Dr. B. Vasu, Department of Mathematics.' with category 'Sanctioned Research Project' and dates 'Aug 5, 2026 - Aug 27, 2026'. At the bottom of the form, the URL '/manage-announcements' is displayed.

2

Manage News & Events publishes institute news, with optional event dates and images — the same content pipeline that feeds the portal's public homepage.

The screenshot shows the 'Manage News & Events' form. The left sidebar contains navigation links: Dashboard, Projects, Expenditure Details, Add Grant Received, Recruitment, Fellowship, Research Proposals, and PhD NOC Requests. The main form area has the following fields:

- Title ***: A text input field with a placeholder 'Enter title'.
- Type ***: A dropdown menu with 'News' selected.
- Content ***: A large text area with a placeholder 'Write content here...'.
- Event Date (if applicable)**: A date picker showing 'dd-mm-yyyy'.
- Title Image (for index page)**: A file upload button labeled 'Choose File No file chosen'.
- Additional Images (max 4)**: A section for uploading multiple images.

The recommended size for the title image is 1200 x 630 px. The URL at the bottom is `/manage-news-events`.

3.5 Institute-wide projects, expenditure & reports

Because the R&C office sits institute-wide rather than inside one department, its view of Projects and Reports spans every PI, not just one.

1

The Dean's **Projects** list is the same screen a PI sees, but scoped institute-wide — every sanctioned project across every department appears here.

The screenshot shows the 'My Projects' dashboard. The left sidebar is the same as in the previous screenshot, but 'Projects' is highlighted. The main area displays a table of projects with the following columns: S.NO, PROJECT INFO, AGENCY, TIMELINE, FUNDING, and ACTIONS.

S.NO	PROJECT INFO	AGENCY	TIMELINE	FUNDING	ACTIONS
1	AI Test Project Type-I: Research Projects	IIT	Started: 2026-03-01 Duration: 12 mo	₹1,00,000.00 Total Sanctioned	View Edit Delete
2	Test Project Type-I: Research Projects	DST	Started: 2024-06-01 Duration: 36 mo	₹2,00,000.00 Total Sanctioned	View Edit Delete
3	Phase 3d E2E Project	DST	Started: 2024-06-01	₹6,00,00,000.00	View Edit Delete

The URL at the bottom is `/projects`.

2

View Expenditure lets the office search any faculty member's transaction history by project and budget head – the institute-wide counterpart to a PI's own Expenditure Details page.

NOT CAPTURED	Budget reappropriation and refund-recording controls (	projects.record-refund	) exist as permissions in the access catalogue but did not surface a dedicated UI action on the seeded demo project during this walkthrough — likely reachable from a different project's action menu once a refund has actually been logged against it.
--------------	--	------------------------	--

ROLE 04

Director

The **Director** sits above the Dean in the institute's approval hierarchy and holds a mostly overlapping set of office-facing pages — request queues, payments, faculty accounts, offer letters — plus one distinct permission: managing institute-wide **Announcements** alongside R&C office staff, a deliberate exception carried over from before this access model existed.

Signed in as directorrc • Director

4.1 Director dashboard

- 1 The Director's dashboard and sidebar mirror the R&C office's own set of queues — Processed, Approved, and Forwarded requests, Leave & NOC approvals, and content management — reflecting the Director's role as a senior escalation point above the Dean rather than a day-to-day operator.

WHY Institute-wide announcements are the one content type the Director can publish directly, independent of the R&C office — recognising that some notices (a policy change, an institute-wide call) properly originate from the Director's desk.

Like the Dean, the Director can **Manage Announcements** — the one content page the catalogue grants to the Director specifically, alongside the office roles.

ROLE 05

SuperAdmin

The **SuperAdmin** configures the system itself rather than doing research administration. Two screens matter above all others: deciding **which role can open which page**, and defining **the sequence of approval stages** every request type travels through. Change either one, and every user in the portal is affected on their very next request — there is no deployment step.

Signed in as superadmin • Workflow Administrator

5.1 Roles & Access — the permission model

This is the single most consequential screen in the portal. It is the live source of truth behind every sidebar link and every "you don't have access" message everywhere else in this manual.

1

WHY Before Phase 8 of this system's development, page visibility was 23 hardcoded conditions buried in frontend code — changing who could see a link meant editing code and redeploying. This screen replaced that with data: a SuperAdmin's change takes effect on a user's very next page load.

Roles & Access lists every role in the system — Applicant, ComputerCentre, Dean, and more — each showing how many people currently hold it. Built-in roles (marked with a lock) cannot be renamed or deleted, because approval routes refer to them by name.

The screenshot shows the 'Roles & Access' page in the MNNIT R&C SuperAdmin interface. The page has a dark blue sidebar on the left with the MNNIT R&C logo and the text 'SUPERADMIN'. The sidebar contains a list of navigation items: Dashboard, Recruitment, Leave & NOC Approvals, Computer Centre Ads, Approval Routes, and Roles & Access (which is highlighted in blue). The main content area has a dark blue header with the text 'Workflow Administrator SuperAdmin' and a 'Log Out' button. The main content area is titled 'Roles & Access' and has a subtitle 'Which pages each role may open, and who may see whose data.' Below the subtitle is a yellow notification bar that says 'Changes take effect on the next request. There is no deployment step.' The main content area is divided into two tabs: 'Role permissions' (which is selected) and 'Per-person exceptions'. Under the 'Role permissions' tab, there is a list of roles: 'Applicant' (12 people), 'ComputerCentre' (1 person), and 'Dean' (1 person). Each role has a lock icon next to it. To the right of the role list is a large light blue box with a shield icon and the text 'Select a role to see and change what it may open.' At the bottom of the page, there is a footer with the text '/admin/roles'.

Roles & Access

Which pages each role may open, and who may see whose data.

Changes take effect on the next request. There is no deployment step.

Role permissions Per-person exceptions

Applicant 12 people

ComputerCentre 1 person

Dean 1 person

Select a role to see and change what it may open.

/admin/roles

2

Selecting a role — here, **HOD** — opens a full checklist of every page in the system, grouped by module, with a scope selector (Own / Department / Institute) per page. Ticking a module ticks every page beneath it; unticking one page inside a ticked module shows a dash, marking a deliberate exception.

Roles & Access
Which pages each role may open, and who may see whose data.

Changes take effect on the next request. There is no deployment step.

Role permissions Per-person exceptions

Applicant 12 people

ComputerCentre 1 person

Dean 1 person

HOD [Save permissions](#)

Ticking a module ticks every page under it. Untick individual pages to make exceptions — the module box then shows a dash.

Module	General	Path	Scope
☒ Dashboard	General	/dashboard	Own
☒ My Profile	no menu link	/profile	Own

/admin/roles – HOD permissions

3

Scrolling further down the same editor shows exactly which pages are unchecked for HOD — for example, **Record Project Refund** is intentionally left off, since refunds are an R&C office action, not a departmental one.

HOD 1 person

Library 1 person

RegularStaff 7 people

SuperAdmin 1 person

Superintendent 1 person

New role name [+](#)

Built-in roles cannot be renamed or deleted: approval routes refer to them by name, so a rename would silently break every stage that grants them.

Module	General	Path	Scope
☐ Record Project Refund	no menu link	/projects/:id/refunds	
☐ Expenditure	Faculty		0/2

☐ Type-III: Consultancy		/type-3	
☐ Type-IV: Testing		/type-4	
☐ Type-V: Other Activities		/type-5	

/admin/roles – HOD permissions, scrolled

5.2 Approval Routes — workflow configuration

If Roles & Access decides who can open a page, Approval Routes decides what happens to a request once it is submitted on that page — the exact sequence of stages, and who may act at each one.

1

WHY Different request types genuinely need different chains — a Consumable indent under BRD's lowest value band only needs PI, HOD, and Dean sign-off, while Equipment and Contingency indents route through Superintendent, Deputy Registrar, and the Director. Encoding this as configuration, not code, means a policy change does not need a new software release.

Approval routes lists every request type — Consumable Indent, Contingency Indent, Equipment Indent, Travel Indent, and more — as a visible chain of named stages, each stage expandable to show exactly who may act on it.

NOTED Navigating to Computer Centre Ads as the SuperAdmin account returned

403 despite that page being listed for the SuperAdmin role in the access catalogue — logging in directly as the seeded ComputerCentre account (see the next section) reached the same page with no error, confirming the page itself works correctly and this is a narrow gap for the SuperAdmin account specifically.

ROLE 06

Library & Computer Centre

Two narrow, single-purpose roles, each with exactly one job in the portal. **Library** is the first checkpoint in a research scholar's ID card pipeline. **Computer Centre** is the last stop for a recruitment advertisement before it is published for candidates to see.

Signed in as library1 (Library) and computercentre1 (Computer Centre)

6.1 Library — ID card requests

1

WHY The Library is deliberately Stage 1 of the ID card pipeline, not the last — a scholar needs library access confirmed before anyone else signs off, since the ID card doubles as their library membership card.

A Library account's sidebar holds exactly one working page: **Student ID Card Requests**, showing the same four-stage pipeline PIs see, with the Library's own queue as Stage 1.

6.2 Computer Centre — recruitment advertisements

1

WHY Publishing a recruitment advertisement is a technical action — putting it live on the institute's website — kept separate from the academic decision to advertise a position at all, which belongs to the PI and HOD earlier in the chain.

Computer Centre — Recruitment Advertisements is where already-approved advertisements wait to be published across departments; empty here because none were pending publication at the time of this walkthrough.

Fellow (Research Scholar)

A **Fellow** is a Junior Research Fellow or similar project staff member — someone who exists in the system only after they have been hired through the Recruitment pipeline described in the Faculty section. There is no shortcut to this role: an account only becomes a Fellow the instant a Dean approves that candidate's joining report, at which point `ApplicantRoleService.PromoteToFellowAsync` strips the Applicant role and grants Fellow. For this manual, a real candidate was carried end to end through that exact pipeline — advertised, applied to, screened Eligible, ranked on a signed merit list, Dean-approved, offered, and joined via Faculty submission → HOD forward → Dean approval — to reach a genuine, database-backed Fellow account, screenshotted live below rather than described from source.

Signed in as a freshly promoted Fellow account, joined against the "College management software" project's Tester position

7.1 Fellow dashboard

1

WHY The sidebar itself is the clearest proof of the role transition — an Applicant's "My Applications" link survives (a Fellow keeps their application history), but the recruitment-facing pages disappear and five new Fellow-only pages appear in their place.

Once promoted, the account's badge reads **FELLOW** and the sidebar exposes exactly five pages: Dashboard, Fellowship, Leave, PhD NOC Requests, Student ID Card Requests, and My Applications — the last one carried over from the account's Applicant days.

7.2 Fellowship claims

A Fellow's own version of the page PIs and HODs review from the other side: raising the monthly stipend claim that then travels PI → HOD for approval.

1

WHY The fellowship and leave modules are both gated on the ID card being issued (`IssueIdCardAsync`) — raising a September claim failed with a 403 "ID card not issued" until an ID card number was recorded against this Fellow's appointment, confirmed live during this walkthrough before the claim would go through.

At `/fellowships`, a Fellow raises their monthly claim — amount and HRA are computed server-side from the recommended stipend on file. This one was raised for September 2026 and immediately shows **Pending PI Review**, the same claim record the PI and HOD sections above approve from their side of the desk.

The screenshot shows the MNNIT R&C Fellow dashboard. The left sidebar contains links to Dashboard, Fellowship (highlighted), Leave, PhD NOC Requests, Student ID Card Requests, and My Applications. The top right shows the user is Manual Test Fellow (M) with a Log Out button. The main content area is titled 'Fellowship' and 'Your monthly fellowship claims.' with a 'Claim this month' button. Below is a table with columns: PERIOD, FELLOWSHIP, HRA, TOTAL, LEAVE / ABSENCE, STAGE, and ACTIONS.

PERIOD	FELLOWSHIP	HRA	TOTAL	LEAVE / ABSENCE	STAGE	ACTIONS
September 2026 Cycle: 21st-20th	₹37,000.00	₹0.00	₹37,000.00	0 / 0	Pending PI Review	Download

`/fellowships` — after raising a claim

7.3 Leave requests

1

At `/leaves`, a Fellow applies for annual or special leave against their BRD entitlement – 30 annual and 15 special days per project year, both visible as running balances. A 3-day Annual Leave request submitted here immediately reduced the balance to 27 remaining and shows stage **Raised**, pending PI and HOD approval in the same queues captured earlier.

`/leaves` – after applying for leave

7.4 PhD NOC requests

1

At `/noc-requests`, a Fellow requests a No Objection Certificate for external research activity – here, an industry internship – supplying an enrolment number, purpose, and target organisation. The submitted request shows stage **Pending PI Approval**.

`/noc-requests` – after submitting a request

7.5 Student ID card requests

- 1 At `/id-card-requests`, a Fellow can separately request a physical Research Scholar ID card through the same four-stage pipeline the Library and PI sections above process — Library queue first, then PI, HOD, and Dean. The request raised here sits at **Pending Library Approval**, stage one of BRD A4's role-gated sequence.

The screenshot shows the MNNIT R&C Fellow dashboard. The left sidebar contains navigation links: Dashboard, Fellowship, Leave, PhD NOC Requests, Student ID Card Requests (highlighted), and My Applications. The main content area is titled "Research Scholar ID Card Management" and includes a "Request ID Card" button. Below this, a "Role-Gated 4-Tier Sequential Workflow" is described: Strict Sequential Approval Chain: Library → PI → HOD → Dean. Each stage requires its exact designated role. The "ROLE-GATED SEQUENTIAL APPROVAL HIERARCHY PIPELINE (BRD A4):" is visualized with four stages: Stage 1: Library (Library Role Only), Stage 2: PI (PI / Faculty Role Only), Stage 3: HOD (HOD Role Only), and Stage 4: Dean (Dean Role Only). A tabbed interface shows "All Requests" selected, with other tabs for Library Queue, PI Queue, HOD Queue, Dean Queue, Issued Cards, and Rejected. Below the tabs is a table with columns: SCHOLAR NAME, ROLL / ENROLLMENT, DESIGNATION, DEPARTMENT & PROJECT, ID CARD NUMBER, CURRENT APPROVAL STAGE, and ROLE ACTION.

`/id-card-requests` – after requesting a card

7.6 My Applications — the Applicant history that survives

- 1 At `/my-applications`, the Fellow's original candidature is still visible in full: screening result **Eligible**, interview mode, merit rank **1**, and outcome **Selected** — the complete record of the same recruitment drive this account was just promoted out of.

The screenshot shows the MNNIT R&C Fellow dashboard. The left sidebar contains navigation links: Dashboard, Fellowship, Leave, PhD NOC Requests, Student ID Card Requests, and My Applications (highlighted). The main content area is titled "Candidate Panel" and includes a sub-header "Apply to research vacancies and manage your active project applications." Below this, there are two tabs: "My Applications" (selected, with a count of 1) and "Explore Opportunities". The "My Applications" tab displays a table with columns: S.NO, APPLICANT NAME, SCREENING STATUS, INTERVIEW MODE, MERIT RANK, OUTCOME, and APPLIED ON. The table contains one entry for "Manual Test Fellow" (ID: 9876543210) with a screening status of "Eligible", interview mode of "Offline Mode", merit rank of "1", and outcome of "Selected", applied on "31 Aug 2026".

`/my-applications`

Applicant

An **Applicant** is anyone outside the institute applying for a Junior Research Fellow or similar advertised position. They start with no account at all — the portal's public registration page is the very first screen a candidate sees, before they can view or apply to anything.

8.1 Registration

Unlike Faculty accounts (created only by the R&C office), an Applicant account is fully self-service — anyone can register directly from the public login page.

- 1 The public **Register to apply** form asks only for a full name, email address, and password — deliberately minimal, since a candidate's real qualification details are captured later, on the specific position they apply to.

MNNIT R&C Portal
RESEARCH & CONSULTANCY

Register to apply

You will need to confirm your email address before you can apply for a position. One account covers every project you apply to.

FULL NAME *

Enter full name

EMAIL ADDRESS *

name@example.com

/register

2

WHY Email verification is meant to stop a recruitment advertisement being spammed with fake or unreachable applicants.

After submitting, the candidate lands on a **Check your email** confirmation screen and is asked to click the verification link they receive.

/register – after submit

3

That link lands on `/verify-email`, a public page (no sign-in required) that reads a `userId` and a `token` from the URL's query string and exchanges them with the API for a confirmed email address. Opened without those parameters — or with a stale/tampered link — it renders this plain "Confirmation failed" state instead, with a way back to registration; a valid link instead shows a green "Email confirmed" state with a direct link to sign in.

/verify-email – no token

FIXED An earlier build of this portal let a signed-in but unverified account submit a full application without ever clicking the emailed verification link — the "Check your email" step above was decorative rather than enforced. This has since been corrected: applying now checks the account's real email-confirmed status on the server, and an unverified account is rejected at submission.

8.2 Candidate Panel & browsing open positions

Once signed in, an Applicant's whole world is the Candidate Panel — a dashboard plus two tabs: what they've applied to, and what's currently open.

- 1 The Applicant dashboard is deliberately sparse — there is nothing to configure and nothing to review here yet; it exists mainly as a landing page after sign-in, with the real content one click away in the sidebar.

2

The **Explore Opportunities** tab lists every position a PI has advertised and is still accepting applications for — here, a single open "Tester" role. Each listing carries an **Apply Now** button straight into the application form.

8.3 Applying & tracking outcomes

The Apply form asks for exactly what a screening committee needs to make a first pass — name, mobile number, qualification, and relevant experience — nothing the position's advertisement doesn't already justify.

1

WHY The same submission becomes the candidate row the PI screens, the selection committee ranks, and the HOD/Dean eventually approve for joining — this one screen is the seed of everything covered in the Faculty and HOD Recruitment sections above.

After submitting, the **My Applications** tab shows the application immediately with its live status columns — screening result, interview mode, merit rank, and outcome — all starting blank ("Not screened" / "Under consideration") and filling in as the PI's side of the process advances.

The screenshot shows the MNNIT R&C Applicant Portal. The left sidebar contains a 'Dashboard' link and a 'My Applications' button. The main content area is titled 'Candidate Panel' with the subtitle 'Apply to research vacancies and manage your active project applications.' Below this, there are two tabs: 'My Applications' (active, showing 1 application) and 'Explore Opportunities' (showing 1 opportunity). A table displays the application details:

S.NO	APPLICANT NAME	SCREENING STATUS	INTERVIEW MODE	MERIT RANK	OUTCOME	APPLIED ON
1	Priya Manual Applicant 9876543210	Not screened	Offline Mode	—	Under consideration	31 Aug 2026

Below the table, the URL `/my-applications` is shown with the text '— after applying'.
