

Equipment Indent Approval Workflow

How a Principal Investigator's request to purchase project equipment is raised, escalated through the office, and finally approved or rejected. Same seven-stage office-escalation route as consumable and contingency indents, with one extra document required once the equipment bill is submitted.

Raised by Principal Investigator (Faculty), against a project budget head **Stages** 7

Terminal outcomes Approved (at Director) · Rejected

As with the other procurement indents, the budget head's uncommitted balance is checked before the indent can be raised — equipment purchases can be large, so this check matters more here than for smaller consumable buys.

APPROVAL SEQUENCE

1 Raised

Forward

The PI raises the equipment indent with description, estimated cost, and GeM availability. The raiser's own stage.

2 Signed Copy Uploaded

Forward only

The signed printed form is uploaded.

3 Assigned

Forward only

The office assigns the file for processing.

4

Forwarded

Forward only

General office escalation continues.

5

Forwarded to OSRC

Forward only

The file reaches the OSRC office queue.

WHY As with the other indent types, stages 2–5 are pure hand-offs — Regular Staff through Dean can forward the file, but only the last two stages carry the authority to approve or reject.

6

Forwarded to DR

Approve

Reject

Dean or Director may approve or reject.

7

Director

Approve

Reject

Final decision. Approval clears the equipment purchase to proceed.

NOTE Value and GeM availability decide the printed annexure form and whether a purchase committee is needed above ₹2,00,000 (non-GeM) — the seven-stage route itself is identical regardless of the equipment's cost.

DOCUMENTS REQUIRED

DOCUMENT	STATUS	PHASE
Generated Indent Form	Mandatory	Indent
Signed Indent Copy	Mandatory	Indent
GeM Quotation	Optional	Indent

Bill Cover Letter	Mandatory	Bill
Original Bill	Mandatory	Bill
Measurement Book	Mandatory – equipment only	Bill
Stock Entry Proof	Optional	Bill
E-Way Bill	Optional	Bill

NOTE The Measurement Book is required only for equipment indents — it verifies physical delivery and installation, which doesn't apply to consumables or contingency spends.
