

Consumable Indent Approval Workflow

How a Principal Investigator's request to purchase project consumables (lab chemicals, small supplies, and similar recurring items) is raised, escalated through the office, and finally approved or rejected. This is one of six request types that share the portal's standard seven-stage office-escalation route.

Raised by Principal Investigator (Faculty), against a project budget head **Stages** 7

Terminal outcomes Approved (at Director) · Rejected

Before an indent can be raised, the portal checks that the project's budget head has enough uncommitted balance to cover the estimated cost — sanctioned amount for the current project year, minus everything already committed by other active indents and travel claims against the same head, minus what has already been paid. An indent that would overdraw the head is refused at the point of raising, not caught later.

APPROVAL SEQUENCE

1

Raised

Forward

The PI raises the indent — item description, estimated cost, and whether the item is available on the Government e-Marketplace (GeM). This is the raiser's own stage.

2

Signed Copy Uploaded

Forward only

The printed, signed indent form is uploaded and the file moves on.

3

Assigned

Forward only

The office assigns the file for processing.

4

Forwarded

Forward only

General office escalation continues.

5

Forwarded to OSRC

Forward only

The file reaches the OSRC office queue.

WHY Stages 2 through 5 can only be forwarded — never approved or rejected — by Regular Staff, Superintendent, Deputy Registrar, HOD, or Dean. These are processing hand-offs, not decision points: the portal deliberately keeps the power to approve or reject concentrated at the two stages below, so an indent cannot be quietly killed or waved through in the middle of the chain.

6

Forwarded to DR

Approve

Reject

The Dean or the Director can approve or reject here — the first point in the chain where a real decision is made.

7

Director

Approve

Reject

Final decision point. The Director approves or rejects; approval closes the indent for procurement to proceed.

NOTE Estimated cost and GeM availability determine which printed annexure form is generated and whether a purchase committee roster is required (only the ₹2,00,000–₹25,00,000 non-GeM band requires one) — they do **not** change which stages or roles this indent passes through. Every consumable indent, regardless of value, follows the same seven-stage route above.

DOCUMENTS REQUIRED

DOCUMENT	STATUS	PHASE
Generated Indent Form	Mandatory	Indent
Signed Indent Copy	Mandatory	Indent
GeM Quotation	Optional	Indent
Bill Cover Letter	Mandatory	Bill (after procurement)
Original Bill	Mandatory	Bill
Stock Entry Proof	Optional	Bill
E-Way Bill	Optional	Bill
